Financial Education

Program Leader

Andy Mayer has over 14 years experience as a trader and manager in the investment banking industry. He began his career in London with NatWest Global Financial Markets, and worked for Credit Agricole and Morgan Stanley before moving to Asia in 2010. His most recent banking role was running the Asia FX derivatives department at CIBC Hong Kong.

Andy has a BSc from the University of Durham, England and an MSc in mathematical modelling from Edinburgh University, Scotland. He holds a diploma in technical analysis (distinction) from the Society of Technical Analysts.

Technical Analysis – Candlesticks

Introduction

Technical Analysis or charting is one of the most commonly used tools for trading any financial product. Japanese rice traders first started drawing charts of rice prices in the mid 16th century and three centuries of innovation and improvement led to a method of charting known as Japanese Candlesticks. Ever since candlestick charting was introduced to the west in 1989 it has been one of the most popular tools of technical analysts around the world.

Who the course is for

- Traders
- Investors
- Bank sales people
- Graduate Trainees
- Anyone new to Technical Analysis

Learning outcome

Upon completion of the course, students will understand the message behind the common candlestick patterns and be able to use them to predict and profit from moves in the markets.
